EAJM

The Eurasian Journal of Medicine

Formerly Atatürk Üniversitesi Tıp Dergisi

Aims and Scope

The Eurasian Journal of Medicine (EAJM), formerly Atatürk Üniversitesi Tıp Dergisi (the last issue published under this name is 2006, volume 38/2), is the official journal of Atatürk University School of Medicine. The EAJM has been the regular publication of the School of Medicine since 1968. The journal is a peer-reviewed, nonprofit scientific periodical. Three English-language issues have been published each year (in April, August and December) since 2008.

The aim of the EAJM is to publish original research papers of the highest scientific and clinical value in all medical fields. The EAJM also includes reviews, case reports, editorial short notes, images of interest and letters to the editor that are related to recently published articles.

The EAJM adheres to the highest ethical and editorial standards. The editors of the journal endorse the Editorial Policy Statements Approved by the Council of Science Editors Board of Directors (www.councilscienceeditors.org/services/draft_approved.cfm). The journal is in compliance with the Uniform Requirements for Manuscripts Submitted to Biomedical Journals, which is published by the International Committee of Medical Journal Editors (updated October 2008, www.icmje.org).

Subscription Information & Request Permissions

The EAJM is sent free of charge to authors published in the issue, medical faculties, libraries and selected academicians in Turkey.

Currently, all contents published from 2000 through the last issue can be accessed in full-text form free of charge through the journal's website (www.eajm.org). All contents from 1968 to 2000 is available on the website.

Requests for permissions to reproduce material should be sent to the editorial office.

Address: Atatürk Üniversitesi Tıp Fakültesi Dekanlığı, EAJM Dergisi Sekreterliği, 25240, Erzurum, Turkey

Phone: +90 442 231 72 94

Fax: +90 442 236 09 68

E-mail: eajm@atauni.edu.tr

Instructions for Authors: Instructions for authors are published in the journal and are available online at www.eajm.org.

Material Disclaimer

The author(s) is (are) responsible for articles published in the EAJM. The editor, editorial board and publisher do not accept any responsibility for the articles.

The journal is printed on acid-free paper.

Vol.: 42 Issue: 2 August 2010

EAJM

The Eurasian Journal of Medicine

Formerly Atatürk Üniversitesi Tıp Dergisi

Instructions for Authors

The Eurasian Journal of Medicine (EAJM) publishes clinical and experimental work related to the field of medicine. In addition to original material, the EAJM prints reviews, case studies, images of interest and letters to the editor.

An approval of research protocols by ethic committee in accordance with international agreements (Helsinki Declaration of 1975, revised 2002 - available at <http://www.vma.net/e/policy/b3.htm> <<http://www.vma.net/e/policy/b3.htm>>, "Guide for the care and use of laboratory animals - www.nap.edu/catalog/5140.html) is required for experimental, clinical and drug studies.

The signed statement of scientific contributions and responsibilities of all authors and statement on absence of conflict of interests are required.

The authors should acknowledge and provide information on grants, contracts or other financial support of the study provided by any foundations and institutions or firms.

MANUSCRIPT TYPES

1. Original articles
2. Case reports
3. Letters to the editor
4. Images of interest
5. Reviews

MANUSCRIPT PREPARATION

Preparation of manuscripts should conform to the updated Uniform Requirements for Manuscripts Submitted to Biomedical Journals (<http://www.icmje.org>). All manuscripts must be submitted electronically. The manuscript file you submit must be saved as .doc (MS Word document).

Original articles

Original articles should follow the basic structure of abstract, introduction, methods, results, discussion, references, and tables and figures (as appropriate). Submissions should typically not exceed 400 words for the abstract and 4000 words for the content; they should include no more than 35 references. Figures and/or tables should be limited to a total of ten.

Case Reports

Case reports should not exceed 2000 words with two tables or illustrations, a short unstructured abstract, and ten references. Case reports should follow the basic structure of an unstructured abstract, introduction,

case report, discussion, references, and tables and figures (as appropriate). We do ask that authors indicate that they have obtained patient consent.

Letters to the Editor

We welcome letters in response to articles published in the EAJM. Submissions must reach us before the next issue is published. They should be a maximum of 500 words, with one figure or table and no more than five references. Letters to the editor should include a title page and must only concern articles that were recently published in the EAJM. A response to the letter will be requested from the author of the article in question; the letter and the response will be published together if there is a response.

Images of Interest

Our image section consists of a case report of 250 words, a few instructional points, a maximum of two figures, and two references. We do ask that authors indicate that they have obtained patient consent if applicable. Image submissions should also include a title page, keywords and references. No additional legend subtitles for figures are necessary.

Reviews

Although they are usually commissioned, we occasionally accept unsolicited review articles.

MANUSCRIPT TYPES IN DETAIL

TYPE	WORD LIMIT	ABSTRACT WORD LIMIT	TABLE & FIGURE LIMIT	REFERENCE LIMIT
Original article	4,000 words, not including abstract, references, tables and legends	400 words	10	35
Case report	2,000 words, not including abstract, references, tables and legends	200 words	2	10
Letter to the editor	500 words	N/A	1	5
Image of interest	250 words	N/A	2	2
Review	N/A	N/A	N/A	N/A

MANUSCRIPT FORMAT

The manuscript format must be presented in the following order:

1. Title page
2. Abstract
 - a. Objective
 - b. Materials and Methods
 - c. Results
 - d. Conclusion
 - e. Keywords (3 to 6)
3. Main text (tables should be inserted where cited in the text; images must be uploaded as separate files)
 - a. Introduction
 - b. Materials and Methods
 - c. Results
 - d. Discussion
4. Acknowledgements, Competing interests, Funding
5. References

Title page

Please provide a concise and informative title of fewer than 150 characters. Include a list of all contributing authors and their affiliations. Supply full correspondence details for the corresponding author, including phone and/or fax number and e-mail address. Provide a short title for the manuscript (limited to 75 characters).

Abstract

Please include an abstract of 400 or fewer words. The abstract should be easily understood without reference to the text (see *Ann Intern Med* 1987; 106: 598-604).

The abstract must have four separate, structured paragraphs (Objective, Materials and Methods, Results and Conclusion) that correspond to the research question, materials/patients and methods, results, and the answer the question. If necessary, one or two sentences with background information may be included before the question. The question and answer should be the same as those in the text. Include only a few important values, and avoid using abbreviations or reporting statistics

Keywords

Please provide a list of 3 to 6 keywords. The keywords should be listed alphabetically and in full without abbreviations. Keywords are best expressed as MeSH (Medical Subjects Headings) terms, the controlled vo-

Vol.: 42 Issue: 2 August 2010

EAJM

The Eurasian Journal of Medicine

Formerly Atatürk Üniversitesi Tıp Dergisi

cabulary used by Pub-Med. The MeSH browser available online (<http://www.nlm.nih.gov/mesh/MBrowser.html>) provides a guide to the selection of keywords.

Introduction

State the question you asked (or the hypothesis to be tested) and the considerations leading to the formulation of the question. Give only pertinent references. Case reports should also include an introduction section.

Materials and Methods

Study subjects or animals

- Clearly describe how the subjects or experimental animals were identified, including the control subjects (if used). For animals, see *Laboratory Animals*, 1985; 19: 106-108.
- Clearly state the eligibility criteria for cases and controls in observational studies or for subjects in clinical trials.
- All work involving human subjects is expected to have received approval from local ethics committees and the regulatory authorities (when appropriate; for example, for studies involving drug trials).
- Animal experimentation must be performed according to the Helsinki Convention for the use and care of animals.
- The editors reserve the right to refuse work that does not conform to acceptable ethical criteria.

Study design

- Clearly state the main study objective(s).
- Provide an overview of the main tests or experiments.
- Consider sample size and whether you have enough subjects to reliably address the research question.
- Papers on clinical trials should include details regarding sample size calculation (i.e., expected effect size, power, level of statistical significance and one- or two-sided tests). Sample size should be reproduced independently.

Methods

- Describe the methods and apparatus in sufficient detail as to allow other researchers to evaluate or reproduce the tests/experiments.
- If the methods have previously been published, provide only a reference or a reference and a brief description.
- Identify drugs and chemicals, including generic name, dosage and route of administration.

- Please provide manufacturer's name and address for equipment, drugs and chemicals. This information should not be presented in a separate section.

Analysis

- Clearly state and define the main outcome measure(s).
- Briefly state the statistical methods used during the analysis if they are standard. New methods should be described with justification.

Results

Keep the Results section brief. Describe the baseline characteristics or condition of the patients or animals. Focus on the important results, i.e., those that help address the research question. Present the majority of the data in figures or tables rather than in the text. Use the text to emphasize or summarize the most important observations.

Discussion

At the beginning of the Discussion, summarize the main results and show how they address the research question. Make sure that the conclusions are consistent with the results and are pertinent to the research question. Describe the limitations of the study and/or analysis, and discuss possible implications of your conclusions. Emphasize new and important aspects of the study. Try to explain contradictory or unexpected results or discrepancies with previous findings.

Acknowledgements

All acknowledgements should be grouped into one paragraph and placed after the Discussion. Only acknowledge those who have made substantial contributions to the study.

References

Number references consecutively in the order in which they first appear in the text. Use full size Arabic numerals in square brackets. List all authors when there are six or fewer. When there are more than six authors, list only first three and add *et al.*

References should conform to the style used in *Index Medicus* (Vancouver Style), as shown in the following examples:

- Ahn SS, Kim YJ, Hur J, et al. Preparing first-year radiology residents and assessing their readiness for on-call responsibilities: results over 5 years. *AJR Am J Roentgenol* 2009; 192: 539-44.
- Akgun M, Mirici A, Ucar EY, Kantarci M, Araz O, Gorguner M. Silicosis in Turkish denim sandblasters. *Occup Med* 2006; 26: 1234-40.

- Bourbon J, Henrion-Caude A, Gaultier C. Molecular basis of lung development. In: Gibson GJ, Geddes DM, Costable U, Sterk PJ, Corrin B, eds. *Respiratory Medicine*. 3rd Edn. Elsevier Science, Edinburgh/Philadelphia, 2002; pp. 64-81.

Websites should be listed with the references and not in the text. They should only be used when an original citation is unavailable. Citations should be listed as follows:

- WHO. Severe Acute Respiratory Syndrome (SARS). www.who.int/csr/sars/en/index.html. Date last updated: June 1 2004. Date last accessed: June 1 2004.

Work that has not yet been accepted for publication and personal communications should not appear in the reference list.

Tables

Tables should be created and inserted into the text document using the "Table" and "Insert Table" functions in your word processing package. DO NOT supply tables in a separate file. Tables should be numbered consecutively with Arabic numerals.

Limit decimals to a sensible number. Large tables should be avoided due to space restrictions; otherwise, they may be split. Please provide a clear footnote for all tables, making sure ALL abbreviations and symbols are defined.

Figures

All submitted figures must be numbered and given titles. Whether images, drawings, or graphs, we recommend that no more than four components be used for a given figure (e.g., a, b, c, d). Images embedded in the .doc file WILL NOT be accepted. Images should be formatted with a minimum of 300 dots per inch (dpi). Figures should preferably be supplied in .jpeg. The preferred image mode for color photographic images is cyan-magenta-yellow-black (CMYK). Black and white photographic images should be presented in greyscale.

Figure Legend(s)

It (they) should be placed at the end of the manuscript.

REVISED MANUSCRIPT

When submitting revised manuscripts, we strongly encourage authors to use the "track changes" feature in Microsoft Word or similar software. Otherwise, corrections should be highlighted in red text.
